

APPENDIX L BORAL CORRESPONDENCE

From: Mirjam Tome
To: ["Rebecca.Bestic@boral.com.au"](mailto:Rebecca.Bestic@boral.com.au)
Subject: Maryvale Sand & Gravel Pit
Date: Tuesday, September 26, 2017 3:03:00 PM

Hi Rebecca,

I have just left a voice mail on your mobile but thought I would follow up with an email.

Tom Best passed on your contact details. First Solar is developing the Wellington Solar Farm off Goolma Rd.

In our search the Maryvale Sand & Gravel Pit came up to be in the vicinity of the proposed solar farm and I was wondering whether you would be able to point me to the appropriate person within Boral to discuss any potential impacts on the Quarry due to the development of the proposed solar farm.

Thanks,
Mirjam

Hi Mirjam,

Thank you for emailing Rebecca Bestic regarding First Solar's proposed solar farm in the vicinity of Boral's Maryvale operations. Rebecca no longer works for Boral Property Group, and I am currently managing her workload. Could you please provide some details on your proposed solar farm, including location, project description etc. I would also appreciate it if you could let me know what environmental impacts reduce/impede a solar farm's efficiency (for example dust impacts).

Many thanks

Hi Kate,

Apologies for the delay in getting back to you. I have been on site for the past couple of days.

I have attached the location of the project, outlining the boundaries. The proposed Wellington Solar Farm is north of Goolma Rd, opposite the Transgrid substation and west of the Correction Centre.

The proposed solar farm will be 160MW and spans across 490 ha of land.

We will deal with the impacts of the quarry on the solar farm. Please only review impacts that the solar farm might have on the quarry.

Please feel free to give me a call if you have any questions.

Thanks,
Mirjam

Hi Mirjam,

Apologies for the delay in getting back to you. Boral's Maryvale Quarry is located off Mitchell Highway, on Lot 4 DP 754318. It is located a considerable distance from First Solar's proposed solar farm, and hence we have no objection to the proposed solar farm.

Regards

KATE JACKSON
